HTB CERTIFIED PENETRATION TESTING SPECIALIST IN NUMB3RS

There is a strong cohesion between modules in the Penetration Tester job-role path. Our HTB Academy team have been intentional in making sure that the concepts supplement each other, and any student going through the path from start to finish will get a real-world pentesting experience.

The path leading to the exam and certification exam contain:

8 EIGHT SIMULATED PENETRATIONS TESTS

<div style="text-align: center;">  <p>Active Directory Enumeration & Attacks</p> </div> <p>ONE cross-action Active Directory pentest, broken down step-by-step</p>	<div style="text-align: center;">  <p>Active Directory Enumeration & Attacks</p> </div> <p>TWO mini-simulated (yet realistic) Active Directory pentest as a skill assessment</p>	<div style="text-align: center;">  <p>Pivoting, Tunneling, and Port Forwarding</p> </div> <p>ONE mini-simulated (yet realistic) pentest as a skill assessment</p>
<div style="text-align: center;">  <p>Shells & Payloads</p> </div> <p>ONE mini-simulated (yet realistic) pentest as a skill assessment</p>	<div style="text-align: center;">  <p>Documentation and Reporting</p> </div> <p>ONE mini-simulated (yet realistic) pentest, mixed of exploratory and guided</p>	<div style="text-align: center;">  <p>Attacking Enterprise Networks</p> </div> <p>ONE full blown external → internal pentest, mixed of exploratory and guided</p>

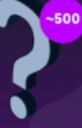

ONE full blown external → internal pentest. 100% exploratory and grey box: student will receive only VPN key and an in-scope network range

TARGETS BREAKDOWN

Across all modules, students will have to enumerate, exploit, and perform post-exploitation on:

250+
TARGETS
